When the king appears at the court, he is umgeben by the court-dignitaries, but not umringt (encircled), still less umzingelt; for they only stand behind him and on both sides Moreover, umgeben is said also of a circle that consists of inanimate things. The sun and the moon are sometimes umgeben by a bright circle which is called a halo. But that which is umringt, is shut in on all sides and into a perfect circle. We therefore umringen something that it may have no egress, and no one an ingress to the same Umzingeln is to close something in more narrowly, to obstruct the egress and to be able to attack it from a short distance. Umringen, therefore, may either have a friendly or a hostile object in view, but umzingeln (to environ, encompass) only a hostile one.

That person is dreift, who in his judgment and actions is free of constraint who is not checked by fear of others Consequently unbefangen (unprejudiced, impartial) is never a fault. Dreiftigkeit (freedom, boldness) may be one, the more so as it approaches to pertness and impudence. In those cases where one's Unbefangenheit (coolness) arises from an absence of fear, it is still a lesser degree of freedom in judging and acting than Dreiftigkeit

Syn. Unbehaglich, unangenehm In the first place unbehaglich points out generally the feeling of displeasure at our actual condition, unangenehm the feeling of disappointment at the failure of a hope or at the absence of some wished-for good. It is unangenehm (disagreeable) to us when a letter does not come which we have anxiously expected, but it is not unbehaglich. On the other hand, a cold room in the winter is very unbehaglich (uncomfortable). Unbehaglichkeit arises, moreover, from a vague feeling which we can as little analyse as its causes, but we are more clearly aware of what is unangenehm, as likewise of the causes.

Syn. Unbeſtandig, veranderlich, wankelmüth(h)ig Veranderlich (mutable, changeable) is an epithet for a person or thing that often and easily changes, or for anything in general which can be changed. Fashion is veranderlich, a man is veranderlich, etc. The proportion between the sides of a triangle is called veranderlich and not unbeſtandig The former, therefore, points more to the susceptibility of undergoing change and is not always a fault. Unbeſtandig implies more a defect of constancy in the state or relation once entered into, and is always a fault, *e. g* ein unbeſtandiger (inconstant) man, unbeſtandiges (fickle) weather. Wankelmut(h)ig (irresolute) can naturally be only used of persons. A man is wankelmut(h)ig when he often changes his thoughts, his choice, his resolves before the execution of them takes place; he is unbeſtandig and veranderlich when he often changes his will or plans after having begun the execution of them. The Wankelmut(h)ige cannot direct his choice to any object with firmness. The Unbeſtandige and Veranderliche does not long remain constant to the choice he has already made; the former cannot make a beginning, the latter cannot persevere.

Syn. Ungern, unwillig, unfreiwillig. When a man compels himself to do anything that is disagreeable to another, he does it ungern and unwillig; he simply does that unfreiwillig, to which he has been compelled by others. We often do something freiwillig (spontaneously, voluntarily) that we nevertheless do ungern (not readily) and unwillig (unwillingly). Unwillig is distinguished from ungern by this, that we do ungern what is excessively disagreeable to us, but unwillig, what we detest, and with such a degree of annoyance or repugnance as to betray it by our behaviour. When any one does anything ungern (not cheerfully), it is disagreeable to him, even if he does not allow it to be perceived; when he does anything unwillig (reluctantly, with repugnance), other persons can perceive it by his looks, gestures, and words.

Unentſchloſſenheit (irresolution) is the difficulty itself of deciding upon something, as long as we are still undecided for want of a preponderance of reasons, and thus becomes Verlegenheit (embarrassment), when we positively must decide upon something, and yet cannot make up our minds to adopt one thing or the other Ungewißheit (uncertainty) makes us indifferent, Zweifelhaftigkeit (doubt), uneasy, Unentſchloſſenheit, inactive, Verlegenheit, distressed, anxious, and fearful. Unrecht denotes (as is implied by its component parts) that which is not right, and is therefore used when speaking of all unlawful acts, also of such as are opposed to duties imperatively incumbent upon us; it is even applied to the conclusions of the understanding, and therefore embraces everything destitute of a rational foundation.

Syn Urt(h)eil, Abſchied, Spruch, Erkenntnis, Beſcheid Abſchied is distinguished from Urt(h)eil, Spruch and Beſcheid by this, that it is an opinion which contains the declared will of such persons who assemble at certain periods to deliberate upon public or national affairs, and form resolutions which obtain a legal power as soon as they are confirmed by the head of the state. Urt(h)eile, Sprüche and Beſcheide, on the other hand, concern private affairs, but in such a manner, that the two first are only used for the decision in suits of law. An Urt(h)eil (judgment) is distinguished, however, from Spruch (sentence) or an Ausſpruch, by being the decision of a law-judge or of a college endowed with judicial authority, whilst on the other hand a Spruch or an Ausſpruch is also the decision of an arbitrator or the verdict of a jury. An Erkenntnis (decision) is as well the Urt(h)eil of a court of law as the Spruch of a collective body of men versed in jurisprudence. A Beſcheid is an answer, a decree, which superiors give to a representation or inquiry, and by which the party so inquiring or representing must regulate his conduct.

ur't(h)eilen, *v a and n.* (über etwas) 1 to pass sentence, decide; 2. to judge; to form, give one's opinion.

Syn. Urt(h)eilen, beurt(h)eilen, richten. I urt(h)eile (form a judgment) that something is true or false, good or bad. Richten (to judge, decree), however, is to urt(h)eilen after such a manner that the Urt(h)eil has a decisive power. Concerning learned works every one can urt(h)eilen (form a judgment), but no one dares richten (pass sentence). He who beurt(h)eilt (criticizes) something, affirms or denies the perfection or faults of any object.

Syn. Verdenken, verargen, verübeln. When a person thinks it wrong, injudicious, or foolish on the part of another, he uses verdenken, and indeed because he considers that the other is principally injuring himself by what he is doing. But when that other person injures others by what he is doing, then the former thinks it wrong or wicked in him to do so; this he expresses by verargen. A person verdenkt it on the part of the buyer, when he gives more for an article than it is worth, and on the part of the seller when he sells that article at a loss or under its fair market-value; both do not act rightly, but they only injure themselves. A person verargt it of a man otherwise estimable, if he lends money to a young spendthrift. For, by doing so, he injures another. When a person takes anything ill or amiss, *i. e.* when he thinks that another has acted wrong towards him, he then uses verübeln.

Syn. Verdrießlich, ärgerlich, gramlich, launiſch, murriſch Verdrießlich and ärgerlich are distinguished from the rest by this, that the motives or reasons of the former are objective, whilst those of the latter are subjective. It is usual, therefore, to assign the cause or motive why a person is verdrießlich and ärgerlich. An impatient person soon becomes verdrießlich, if he is kept waiting too long, and a passionate person soon becomes ärgerlich, particularly if he thinks that it has been done on purpose. Moreover those persons are said to be ärgerlich who are easily vexed about trifles, invalids, for instance, are generally ärgerlich He that complains and laments is grämlich; he that is mürriſch is constantly finding fault; he that is launiſch is inconstant, at times pleased, at other times displeased, without having any just cause for either, sometimes he is grämlich and murriſch, sometimes cheerful and contented. Children can easily be grämlich, but not murriſch, for they can complain, but not find fault. Spoiled children, and women too delicately nurtured are launiſch. Hence it appears that verdrießlich means sore, ärgerlich, indignant, touchy, testy, and also cross, peevish; grämlich is whining, fretful; launiſch, capricious, fickle; and mürriſch, grumbling, scolding, snappish.

Syn. Verdruß, Ärger Verdruß (originally the same as Plage) is merely the soreness or displeasure itself which that causes us which any one does; Ärger is an anger, an irritation, which works more upon the feeling itself than upon external objects Verdruß depresses, Ärger excites the mind. When the injustice committed by others affects us nearly it makes us sad, when we regard it as deserving of punishment we ärgern uns at it. Verdruß affects the mind, Ärger the gall Hence it appears that Verdruß is vexation, Ärger annoyance, irritation. *vid. also* Mißvergnügen

verkau'fen, *v a.* to sell, vend, dispose of ; mit Schaden —, to undersell.

Syn. Verkaufen, verhandeln, abſetzen, vertreiben The parting with any article for a certain price is denoted by verkaufen and verhandeln Verhandeln differs, however, from verkaufen in this, that it alludes to or implies a longer or shorter negotiation, in which an agreement is entered into concerning the final conditions of the contract. The act of offering on both sides is called handeln. Such a handeln may last some time, when both parties are very intent upon increasing their own advantage, and hence verhandeln frequently expresses verkaufen together with the accessory idea of self-advantage, and is, therefore, used in a contemptuous sense. Abſetzen is selling the goods in so far as the stock of goods is lessened by their sale ; this can take place by supplying a large order from one single person ; when any one disposes of a great number of them to several buyers and especially living remote from each other, then one says he vertreibt them, or he carries on a large Vertrieb in this article Hence verkaufen is "to sell," verhandeln "to bargain," abſetzen "to dispose of," and vertreiben means "to carry on business, to do business."

verleum'den, *v. a* to backbite, calumniate, slander, traduce, defame

Syn. Verleumden, verunglimpfen, laſtern, anſchwärzen, ſplitterrichten. He who verleumdet a person to others, relates to them false or unsubstantiated facts to the detriment of that person's character He who verunglimpft him, judges his qualities or actions harshly, illiberally, odiously. The highest degree of verunglimpfen is laſtern, for one laſtert that person on whose perfectly moral and honourable actions and in whose genuine good qualities one passes a judgment degrading in the highest degree. According to this definition, therefore, verleumden is "to backbite or to scandalize," for scandal is either false or not proved; verunglimpfen is "to cry down, to detract from, to asperse," and laſtern is "to calumniate, to slander, to vilify." Now, verleumden and verunglimpfen together constitute anſchwärzen, in so far as the person so verleumdet and verunglimpft stood in good repute previously, and in so far as the motive for such scandal was the exciting of suspicion and distrust against him. This is therefore "to blacken, to libel, to traduce." Splitterrichten is to judge trivial, nay, the most trifling faults with too much severity. It has generally for its object that of convincing others of one's own immaculate conduct and of inducing others to form a high opinion of the strictness of one's own principles. This is "to carp or cavil at," or, more familiarly but more correctly, "to pick flaws, to run down."

Syn I Vernehmen, hören. We hear (hören) a sound, when it generally makes an impression on our organs of hearing, but we only vernehmen it when we distinguish it, hence vernehmen in this sense is "to hear distinctly"

Syn. II. Vernehmen, verſtehen. In order to understand a speech fully, it is necessary, first, that we properly distinguish the syllables and words of which it is composed, and, secondly, that we sufficiently recognize the sense of the speech by means of those words and their context. But to do this, it is further requisite that we be sufficiently acquainted with the language employed by the speaker and with the subject he discourses upon. Hence it is evident that, however distinctly a person may vernehmen (hear) or catch the words the speaker utters, he will be totally unable to verſtehen (understand) him without previously having a knowledge of the language used, or, if in his own language, of the things forming the topic of that discourse.

Every kind of mutilation verunſtaltet (impairs) a man; but it does not follow that it verſtellt (disguises), and entſtellt (disfigures) him.

Syn. Vormals, vor Zeiten, ehemals, vor diesem, vor Alters, weiland. The most remote and venerable antiquity is denoted by vor Alters (in ancient times) Vor Alters (in early ages, in olden times, in times of yore) men reached a more advanced age than now. Vor Zeiten (in former times) does not designate so remote a period, nevertheless it is distinguished from vormals and ehemals by its pointing out an intermediate time of several ages, whilst vormals and ehemals may signify a time past in the same generation or age. One says then · In former times (vor Zeiten) the nobles of Europe lived in their castles and in a constant state of feud. When vormals and ehemals are used of a period of time that is passed, the former denotes a comparison with the present. This is denoted by "formerly." Vor diesem (ere now, before this) donotes quite an indefinite past time which may have formed part of the life-time of the speaker or may have been before his time Weiland (heretofore, whilom, late, ex —) is in common life obsolete, it is still used in the chancery style, and is equivalent to ehemals.

Syn. Vorrede, Vorbericht. It is expected that a Vorbericht (advice to the reader) should be short, and that a Vorrede (preface) should be longer In the Vorbericht, therefore, only certain circumstances are commonly mentioned which may be useful for the reader to know In a Vorrede not only is this done more diffusely, but even the object and utility of the book, the manner in which the reader ought to use it, the importance of the subject-matter, etc., are mentioned. In English an introduction is usually somewhat longer than a preface, Vorbericht (preamble) may therefore be rendered by preface and Vorrede by introduction.

Syn Waffen, Gewehr, Rüſtung, Geſchütz, Stück, Geſchoß Waffen, Gewehr and Rüſtung are first of all such instruments of war as the warrior carries at or on his body; Geſchütz (artillery, ordnance) such as follow the army and are drawn by animals, as cannon The word Waffen (weapons) denotes in its most extended sense everything that can be used for attack, for defence or protection, hence even such limbs of animals as serve for attack or defence are called Waffen, as horns, teeth, claws, etc In the more limited sense we understand by Waffen (arms) the artificial portable instruments which the warrior uses as well for attack as defence. Under the word Rüſtung we understand all the usual artificial Waffen of the warrior as well for attack as for protection; his accoutrements *or* equipment, or else his mail, helmet, harness, armlets and greaves or, in a word, his "armour." Gewehre comprise only instruments of attack and not weapons of defence; they are "arms of offence" The word Stück is used for single cannons (= "piece"); thus we have drei-, ſechs-, zwölfpfündige Stücke, three-pounders, six-pounders, twelve-pounders. The word Geſchoß is now obsolete as a military term, though still used by poets; it corresponds to the English "bolt" *or* "shaft."

Syn. Wert(h), Preis, Gehalt The judgment arrived at concerning the goodness of things is their Wert(h) (worth) The Preis (price) is that which is considered equal to the Wert(h) of anything, especially in money The Preis of things can rise or fall, without their innerer Wert(h) (real value) being increased or lessened. The Gehalt is the real value of the nobler metals and of the coins struck from them. Gold and silver, for instance, are alloyed with base metal; the less, therefore, they contain of alloy, by so much the higher, and the more they contain of it, by so much the lower is their Gehalt (that is, standard).

Syn. Wetter, Witterung. Witterung denotes those changeable circumstances, which commonly change according to the difference of climates and seasons, the Wetter those which change under the same climate and during the same season of the year Witterung signifies the nature of the atmosphere during a longer period of time, Wetter during a shorter. The Germans say. it is beautiful Wetter (weather) when the sun shines and it is not rainy or windy; on the other hand, the Witterung (climate or weather) is by so much the more severe in a country the farther it lies to the north. They say, moreover, to-day is beautiful Wetter (weather), but this spring, this summer, etc., we have beautiful Witterung. In English "weather" has both significations, and "climate" or "season" can seldom be substituted for it in translating Witterung.

Syn. Wüt(h)en, toben. Toben, in the first place, denotes the violent movements of the body, and the noise which accompanies them; wuthen, a strong passion, which robs the mind of consciousness and of the use of reason. In the second place, toben and wut(h)en are also different with respect to the kind of passion, from the immoderate development of which both arise. Wut(h)en, for instance, can arise only from anger or wrath; it is then "to rage, to storm," but toben may result from an excess of joy or merriment; hence it corresponds to the English "to dance, caper, toss about, run wild," etc.

Syn. Zinsen, Renten, Einkünfte Zinsen and Renten consist only of that which is given for the use of a piece of ground or of capital Einkünfte, on the other hand, comprehends all kinds of useful things, which come in, as it were, yearly. The merchant reckons up the profits of his trade, the artist the payments for the productions of his art, the person on pay counts in his pay as part of his Einkünfte, as well as doing so with his Renten and Zinsen In general Renten are distinguished from the Einkünfte from a salary or from the profit of a trade, but they include the Zinsen of one's capital (compare Miet(h)zins, Pachtzins). Zins and Renten are distinguished thus, that Zins (interest) signifies that sum which the giver is obliged to pay and which the capitalist or proprietor has a right of demanding; eine Rente (rent) in as much as the proprietor or capitalist receives it and by that means increases his Einkünfte (income) Hence it will be seen that Zins and Rente, especially the former, do not exactly mean the same thing that "interest" and "rent" mean in English.

Syn. Zutragen (sich), geschehen, ereignen (sich), begeben (sich), vorgehen, vorfallen. Geschehen (to happen, take place) is said of all events or changes, it is the result of doing. If any one does anything, it geschieht (takes place); *e. g* "Light the candle!" — "It is already geschehen (done)" The same is expressed by vorgehen (to come to pass), but with the added idea, that what vorgeht excites especial attention and interest. Precisely this extent of meaning is possessed also by vorfallen (to fall out *or* upon), but with the secondary idea, that that which vorfallt (happens), occurs unexpectedly. A change that excites particular attention, alters the state of things, and with which a longer succession of changes founded on it, and consequent upon each other, begins, begiebt sich (happens, betides); it is a Begebenheit (event, incident). When one considers an event with respect to its changes, whether it is regarded as an effect of physical necessity or as a mere effect of chance, then one says, it has sich zugetragen (has been brought about). It sometimes chances, happens, turns out (tragt sich zu), that continued rainy weather spoils the harvest. Ereignen (to befall) is used in speaking of certain important circumstances, in as far as they have their peculiar consequences. At the entry of the king, it ereignete sich (occurred, happened) that a scaffolding broke, by which many persons lost their lives.

EXPLANATORY REMARKS.

I. The first class changes the radical vowel e into a in the imperfect, and resumes it in the past participle. Ex., Geben, to give; imperfect gab; past part. gegeben. To this class must be added bitten, to entreat (beg), which changes the radical vowel i in the same manner, as: imperfect bat; past part. gebeten.

II. The second class changes the radical vowel e or i into a in the imperfect, and in the past participle into o. Ex., nehmen, to take; imperf. nahm; past part. genommen; gewinnen, to win; imperf. gewann; past part. gewonnen. To these must be added gebaren, produce (to give birth to), which has ä instead of i in the root, as: imperf. gebar; past part. geboren.

III. The third class changes the radical vowel i into a in the imperfect, and in the past part. into u. Ex., ſchlingen, to sling; imperf. ſchlang; past part. geſchlungen; except dingen to hire; imperf. dung; past part. gedungen; ſchinden to flay; imperf. ſchund; past part geſchunden; and thun, to do, imperf. that; past part. gethan.

IV. The fourth class changes the radical vowel a into ie in the imperfect, and resumes it in the past participle. Ex., halten to hold; imperf. hielt; past part. gehalten; except fangen, to catch; imperf. fing; past part. gefangen. The following conform to the principle of the rule, resuming in the past part. the radical vowel or diphthong of the present: laufen, to run; imperf. lief; past part. gelaufen; gehen to go; imperf. ging; past part. gegangen; heißen, to order; imperf. hieß; past part. geheißen; rufen, to call; imperf. rief; past part. gerufen; ſtoßen, to push, imperf. ſtieß; past part. geſtoßen.

V. The fifth class changes the radical vowel ei into ie in the imperf. and in the past part. or before a consonant into i. Ex., bleiben, to remain; imperf. blieb; past part. geblieben; ſchneiden, to cut; imperf. double ſchnitt; past part. geſchnitten.

VI. The sixth class changes the radical vowels ä, au, e, i, ie, ö, ü, into o in the imperf. and past participle. Ex., ſchwären, to fester; imperf. ſchwor; past part. geſchworen; ſaugen, to suck; imperf. ſog; past part. geſogen; ſaufen to drink to excess; imperf. ſoff; past part. geſoffen; heben to lift, imperf. hob; past part. gehoben; verwirren, to embroil (to confuse); imperf. verworr; past part. verworren; bieten, to offer; imperf. bot; past part. geboten; ſchwören, to swear; imperf. ſchwor (ſchwur); past part. geſchworen; lügen, to lie; imperf. log; past part. gelogen.

VII. The seventh class changes the radical vowel a into u in the imperfect, and resumes it in the past participle. Ex., wachſen, to grow; imperf. wuchs; past part. gewachſen; ſtehen, to stand, has ſtand in the imperfect (formerly, however, ſtund), and in the past part. geſtanden.

* The fifth and sixth classes include the greater part of the irregular verbs.
